Conferences

In 2021, the project was presented at several conferences, both in France and internationally. Most of these presentations focused on the project's biodiversity aspect, as well as the fate of pollutants within the filter.

In 2022, several topics were addressed, notably the biodiversity, socio-spatial, and quality aspects, which were the subject of various presentations.

In 2023, the project was presented at several conferences, both in France and internationally. Most of these presentations focused on the pollutant accumulation aspect of the project, as well as on the biodiversity component.

In 2024, several aspects of the project were presented at various conferences, whether aimed at a French-speaking audience or a broader international public.

En 2025, le projet a été peu présenté en raison de l'implication des acteurs dans la réalisation des livrables.
