

PROJECT LIFE ADSORB

Cost

The total eligible cost of the **LIFE ADSORB project** is **€4.6 million, funded at 55% by the European fund.**

The **Métropole du Grand Paris** contributes **€1 million** to the project.

The remaining funding comes from self-financing provided by the project partners.

The LIFE project does not include the downstream structures of the Mare Saint James that redirect water to the Seine via the downstream section of the storm overflow. Taking into account the construction and implementation of these additional structures, **the total operation amounts to €9.6 million.**
