## RÉSULTATS

# Download the ORAGE software now

*Published on 25 July 2025*

Good news! The ORAGE software now includes a brand-new module dedicated to micropollutants, developed as part of the LIFE ADSORB project and it's now available for free download.

This innovative module allows users to model, size, and anticipate the treatment of stormwater loaded with micropollutants. A valuable tool for local authorities, engineers, and network managers looking to address these issues in their development projects.

An open-source, accessible, and evolving tool to better meet the challenges of urban pollution.

□ Find the module and its user guide in the Deliverables section, under Deliverables B3.
