ACTORS

Funders of project

The Life Adsorb project is mainly financed by the European Life program over a period of 5 years as well as the Greater Paris metropolis.

Project Financing

The Life Adsorb project was selected to benefit from the European Life program, which aims to provide funding from the European Union for projects in favor of nature, the environment, and climate action. It is therefore the main funder of the implemented systems, contributing 55% of the total project cost, which amounts to 4.6 million euros. In addition to these funders, the Greater Paris Metropolis provides 1 million euros in funding. The remaining financing comes from self-financing provided by the project partners.
