COMMUNICATION

When government officials come to meet us

Published on 23 October 2025

We recently had the pleasure of welcoming several project officers from the **Ministries of Spatial Planning and Ecological Transition**, who specialize in monitoring **European LIFE programme** projects.

This visit was an opportunity to present in detail our approach, achievements, and the future outlook of the project. The discussions were rich and constructive, highlighting the importance of our initiative.

We are also honored to learn that our project will soon be **featured in their newsletter**, which will help **increase its visibility** and **showcase the collective work** carried out over the past few months.

This recognition is a strong encouragement to continue our efforts and keep innovating to address **current and future environmental challenges**.

Don't miss the latest updates on the **European LIFE programme in France!** Subscribe to their newsletter: [Liste de diffusion du programme européen LIFE -- accueil](#)
