CHANTIER

Works is done!

Between July 2018 and December 2020, the City of Paris carried out a program of sanitation works on the north-eastern part of the Bois de Boulogne.

Published on 14 January 2025

Ces 3 technologies de pointe constituent le projet LIFE Adsorb.

- The storage/pumping station which contains valves, pipes, a screen and 3 pumps.
- The reed bed filter consists of two compartments, one of which is made of an innovative material
- The GAASPAR controller positioned at the filter outlet and which provides remote support

These 3 cutting-edge technologies form the LIFE Adsorb project.
